## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Bridges P.N. 4,751,464.

Bridges discloses a cavity resonator for MRI. Applicant's attention is directed to Fig. 1-2 and corresponding description. A plurality of conductive strips 18 formed with a dielectric medium are arranged into a cylindrical configuration. Note that a cylindrical conductive shield 12 surrounds the conductive strip arrangement. The conductive strips 18 form a multi-channel volume resonator that may have up to 16 channels. See col. 6 lines 26-49. Bridges meets all the limitations of the claims at issue.

### ***Allowable Subject Matter***

3. Claims 6-26 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art considered does not disclose or suggest an array of resonators as claimed driven by a sinusoidal current distribution.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boskamp, Lee et al, Wollin and Vaughan all disclose resonators for MR. Note the abstract of each of the disclosures.
